

Animated Discussion Oral Frame – Glaciers.

Language of cause and effect

As a result of This leads to..... This has had the effect of

One of the main effects is Resulting in The cause of this is.....

It is due to..... As a consequence of..... This in turn causes

The human causes are..... The physical causes are.....

Explanation, Sequencing and linking

Firstly....., Secondly....., Thirdly.... Finally.....

The first effect..... Followed by.....which leads to

In summary In conclusion..... The processes.....

Impacts

Environmental.....Economic..... Social..... Socio-cultural.....

Political.....Positive..... Negative..... Change.....

To some extent..... Mainly..... Partly..... Landscapes.....

A minority Agreement..... Physical..... Human.....

Key words	Definition
Glaciers	a mass of ice flowing down a valley
Glacial Retreat	The Glacier retreats (melts) up the valley
U Shape Valley	The shape of the valley due to the erosion of the Glacier
Moraine	
Depositional Landforms	material found at glaciers
Erosion Landforms	Landforms that result from depositional processes like drumlins, eskers
Meltwater	Landforms that result from erosion processes like hanging valleys.
Sea Level Rise	The water that runs from the glacier as a result of it melting. It includes pieces of material and ice.
	The gradual increase in temperatures world-wide cause the Ice caps to melt and causing the sea level to rise
